## **Terms of Reference Civil Engineer/Quantity Surveyor**

### **Background:**

The Second Disaster Management Project aims at further reducing the country's vulnerability to adverse natural events (hurricane, floods, etc.) through investment in risk management activities. One of the objectives of the project is to further strengthen the infrastructure against the impact of adverse natural events (hurricanes, flooding, etc.) through the implementation of physical mitigation measures. Over sixty-six percent (66%) of the Project funds have been allocated towards physical prevention and mitigation works.

The Project Coordination Unit (PCU) of the Ministry of Physical Development, Environment & Housing is responsible

for the coordination of the Project activities, however, a drawback for the PCU is its inability to analyse and review independently technical reports, Bill of Quantities and cost estimates submitted by the implementing agencies. Although, the responsibility for supervision and monitoring of contracts lies with the implementing agencies, there is a need for the PCU to have the capacity to review the reports and ensure compliance of the works with the signed contracts. The number of variations realized especially on small works can be avoided if the PCU is equipped with the relevant civil engineering expertise, even on a needs basis. Therefore, arrangements have been made for the recruitment of technical expertise for the PCU.

### **Job Summary of the Civil Engineer/Quantity Surveyor**
