Montreal Protocol Project

National Trainer - Good Refrigeration Management Practices, Recovery, Recycling and Retrofitting (RR&R) and Alternative Technologies

BACKGROUND:

SAINT LUCIA is Party to the Montreal Protocol on Substances that Deplete the Ozone Layer and is obligated to phase out its importation and use of ozone-depleting substances (ODS). In January 2010, the first group of ODS, chlorofluorocarbons (CFCs) was successfully phased out by all Parties to the Montreal Protocol. Saint Lucia is currently embarking on the phase-out of the second group of ODS, hydrochlorofluorocarbons (HCFCs), which have an accelerated phase-out date of 2030 (reduced by 10 years from 2040) and would require that Saint Lucia continue to monitor and control the use of ODS.

As such, Saint Lucia's HCFC Phase-Out Management Plan

(HPMP) was approved at the 64th Meeting of the Executive Committee to the Montreal Protocol in July 2011. The HPMP seeks to outline the necessary policy, legislative, institutional and other measures necessary to allow Saint Lucia to phase out the use of HCFCs according to the phase out targets of the Montreal Protocol. One of the interventions of the HPMP is the training of refrigeration and air conditioning (RAC) technicians in 'Good Refrigeration Practices, Recovery and Reuse of Refrigerants and Retrofitting (RR&R) and Alternative Technologies'.

This intervention seeks to strengthen the capability of the refrigeration service industry to reduce demand for virgin HCFCs and refrigerants. This will be achieved through the training of technicians in the technologies emerging to replace HCFCs, particularly natural refrigerants, as well as training in good practices, RR&R and the provision of specialized tools and equipment to facilitate the application of the acquired expertise to demand reduction initiatives.

To this end, the Ministry of Sustainable Development Energy Science and Technology is seeking a National Trainer in Good Refrigeration Practices, RR&R and Alternative Technologies to design and deliver the training as outlined.

OBJECTIVES:

The objectives of this intervention are to:

Expand the scope of similar training undertaken under the Refrigerant Management Plan (RMP) and Terminal Phase-out Management Plan (TPMP) by incorporating issues related to replacement refrigerants for HCFCs, including low global warming potential (GWP) refrigerants;

Reduce demand for virgin HCFCs through improved servicing practices, the recovery and reuse of refrigerants and retrofitting of HCFC-based equipment to non-ODS and low GWP alternatives; and

Promote good health and safety practices when using natural refrigerants.
